Za više žila od navedenih sekvencija boja se ponavlja. Prva boja je osnovna boja, druga boja je boja prstena. Razmak između dva prstena je otprilike 7mm. Za četvorožilni tip postoji razlika od navedenog obrasca zato što su boje bela, žuta, braon i zelena.

For more cores than listed the colour sequence is repeated. The first colour is the basic colour, the second colour is the colour of the ring is marking. The distance between two rings is app. 7 mm. For the 4-core type differs from this pattern because the colours are white, yellow, brown and green.
